

[Download Free Software How To Decrypt Files](#)

What has happened to my files ? Why i am seeing this ?

All of your files have been encrypted with RSA 2048 Encryption. Which means, you wont be able to open them or view them properly. It does NOT mean they are damaged.

Solution

Full-page tip

Well its quite simple only we can decrypt your files because we hold your RSA 2048 private key. So you need to buy the special decryption software and your RSA private key from us if you ever want your files back. Once payment is made, you will be given a decrypter along with your private key , once you run that , All of your files will be unlocked and back to normal.

So there are 2 ways to do this either you wait for a miracle and get your price doubled or follow instructions below carefully and get back your all important files.

Payment procedure

Download a special browser called "TOR browser" and then open the given below link. Steps for the same are -

1. Go to <https://www.torproject.org/download/download-easy.html.en> to download the "TOR Browser".
2. Click the purple button which says "Download TOR Browser"
3. Run the downloaded file, and install it.
4. Once installation is completed, run the TOR browser by clicking the icon on Desktop.
5. Now click "Connect button", wait a few seconds, and the TOR browser will open.
6. Copy and paste the below link in the address bar of the TOR browser.
